Yury Bortsov

Aspiring Software Engineer & Game Developer | Python, C++, UE5 |
High School Student Passionate about AI & Tech Startups
Gdańsk, Pomorskie, Poland

Summary

I am a high school student specializing in Mathematics, Physics, and Computer Science, with a strong passion for software engineering, game development, and artificial intelligence. Driven by a fascination with innovation and the startup ecosystem, I am actively building my technical skill set to create products that make an impact.

Tech Stack & Projects: I code in Python and C++, build web applications, and am currently developing an independent game project in Unreal Engine 5. I also have hands-on experience configuring home servers on Raspberry Pi.

Multimedia & Content Creation: Beyond coding, I am deeply involved in digital media. I recently directed, researched, and edited a professional documentary film that premiered at a local cinema. I also create gaming-related video content and host live streams on YouTube and Twitch.

Leadership & Community: I am an active community member and a team player. My experience ranges from serving as a Junior Camp Counselor—where I developed leadership and organizational skills—to managing school events, providing tech support, and moderating online communities. I am always eager to learn, connect with tech experts, and turn innovative ideas into reality.

Experience

V Liceum Ogólnokształcące im. Stefana Żeromskiego w Gdańsku
1 year

Lead System Developer
2025 - Present (1 year)

Designed, built, and operate a production web platform serving 300+ students, running on a self-managed Debian 12 server. Architected backend with FastAPI and MariaDB, containerized with Docker. Led a security hardening initiative: isolated the Docker socket via a proxy, migrated all containers to run as non-root users, and performed a full production data migration.

Built a Discord bot integration, an in-platform economy/cosmetics system, and public user profiles with custom-generated avatars. Wrote internal handoff documentation to keep the project maintainable across long-term development.

Event Organizer & Tech Support

May 2025 - Present (1 year 3 months)

Co-organize school events, managing logistical and technical aspects.

Provide technical support and operate audiovisual equipment during live presentations.

Gift Helper

Founder

2026 - Present (less than a year)

Co-architected a full-stack monorepo with a Next.js frontend and a Nest.js API. Integrated an LLM-based recommendation engine to generate personalized gift suggestions. Set up GitLab CI/CD pipelines and Git hooks (Husky, lint-staged) to keep code quality consistent across the team. Working with PostgreSQL for data persistence across frontend/backend packages.

YouTube & Twitch (Self-employed)

Video Content Creator & Streamer

November 2024 - Present (1 year 9 months)

Produce, edit, and publish engaging video content focused on the gaming industry.

Host live broadcasts, interact with viewers in real-time, and build and moderate online communities.

Continuously improve technical setup, video editing, and broadcasting skills.

Education

V Liceum Ogólnokształcące im. Stefana Żeromskiego w Gdańsku

Mathematics, Physics, Computer Science · (September 2024 - 2028)
